

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) A non-refillable dispenser adapted for dispensing from a table top and convertible to dispensing from a conventional rolled product fixture, the non-refillable dispenser comprising:

a housing formed to include having a compartment configured to hold sheets therein and a dispensing opening for removal of sheets from the housing, the housing designed ~~configured~~ to be positioned on a table top for dispensing sheets therefrom, the housing including connecting means formed in the housing including two spaced-apart areas of perforations which, when opened, provide a pair of spaced-apart openings which permit a hanging port which permits the housing to be coupled to a fixture, the connecting means masked as a portion of the housing when the dispenser is positioned on ~~for dispensing from~~ a table top for dispensing, the connecting means easily un-masked when the perforations are opened to provide the pair of spaced-apart openings and readily-releasable to permit the housing to be releasably coupled to a fixture.

2. (Currently Amended) The non-refillable dispenser of claim 1, wherein the housing includes a paperboard, ~~connecting means are folded down and held against a portion of the housing when the dispenser is used for dispensing from a table top.~~

3. (Currently Amended) The non-refillable dispenser of claim 1 ~~[[2]]~~, wherein the housing includes a polymer film, ~~connecting means is held against the~~

~~housing by one of adhesive on the arms, a seal, and a combination thereof when the housing is positioned on a table top for dispensing therefrom.~~

4. (Currently amended) The non-refillable dispenser of claim 1, wherein the non-refillable dispenser further comprises an excess of material on one portion of the housing, the excess of material folded against an outer surface of the housing when the dispenser is positioned on a table top, the excess of material releasable such that it forms a tent-shaped configuration having two opposing generally triangular sides, and wherein each triangular side includes one area of perforations. ~~connecting means is formed in the housing.~~

5. (Original) The non-refillable dispenser of claim 1, wherein the housing is configured to be disposed at an oblique angle relative to a vertical support surface when coupled to a fixture.

6. (Original) The non-refillable dispenser of claim 1, wherein the housing is configured to be positioned substantially parallel to a vertical support surface when coupled to a fixture.

7. (Currently amended) The non-refillable dispenser of claim 1, wherein each area of perforations is disposed a location selected from the group consisting of an end and a wall of the housing, at least an upper portion of the housing has a width dimension which is less than a width dimension between support arms of a fixture.

8. (Original) The non-refillable dispenser of claim 1, wherein the sheets include dry sheets.

9. (Original) The non-refillable dispenser of claim 1, wherein the dry sheets are toilet tissue.
10. (Original) The non-refillable dispenser of claim 1, wherein the sheets include dry sheets and premoistened sheets.
11. (Original) The non-refillable dispenser of claim 1, wherein the housing includes a resealable cover.
12. (Currently amended) The non-refillable dispenser of claim 1, wherein the housing includes ~~is constructed from paper, paperboard, cardboard, plastic, polymer film, cellophane, and any combination thereof.~~
13. (Currently amended) A non-refillable dispenser adapted for dispensing from a table top and convertible to dispensing from a conventional rolled product fixture, the non-refillable dispenser comprising:
- a housing formed to include having a compartment ~~configured~~ to hold sheets therein and a dispensing opening for removal of sheets from the housing, the housing [configured] designed to be positioned on a table top for dispensing sheets therefrom, the housing including two spaced-apart areas of perforations formed in the housing which, when opened, provide a pair of spaced-apart openings which permit ~~therein a hanging port which permits~~ the housing to be coupled to a fixture, the purpose for the perforations ~~hanging port~~ masked when the dispenser is positioned ~~for dispensing from on~~ a table top for dispensing, the ~~hanging port~~ purpose for the perforations easily unmasked when the perforations are opened to provide the pair of spaced-apart openings and the housing is and ~~configured to releasably couple coupled to the housing to~~ a fixture in a bathroom.

14. (Currently amended) The non-refillable dispenser of claim 13, wherein the housing includes a paperboard, ~~hanging port is formed in the housing.~~

15. (Currently amended) The non-refillable dispenser of claim 13, wherein the housing includes a polymer film, ~~hanging port is formed from an excess of material on a portion of the housing.~~

16. (Currently amended) The non-refillable dispenser of claim 13, wherein the non-refillable dispenser further comprises an excess of material on one portion of the housing, the excess of material folded against an outer surface of the housing when the dispenser is positioned on a table top, the excess of material releasable such that it forms a tent-shaped configuration having two opposing generally triangular sides, and wherein each triangular side includes one area of perforations, ~~hanging port is held against the housing by one of adhesive on the arms, a seal, and a combination thereof when the housing is positioned on a table top for dispensing therefrom.~~

17. (Original) The non-refillable dispenser of claim 13, wherein the housing is configured to be disposed at an oblique angle relative to a vertical support surface when coupled to a fixture.

18. (Original) The non-refillable dispenser of claim 13, wherein the housing is configured to be positioned substantially parallel to a vertical support surface when coupled to a fixture.

19. (Currently amended) The non-refillable dispenser of claim 13, wherein each area of perforations is disposed a location selected from the group consisting of an end and a wall of the housing. ~~at least an upper portion of the housing has a width dimension which is less than a width dimension between support arms of a fixture.~~
20. (Original) The non-refillable dispenser of claim 13, wherein the sheets include dry sheets.
21. (Original) The non-refillable dispenser of claim 13, wherein the dry sheets are toilet tissue.
22. (Original) The non-refillable dispenser of claim 13, wherein the sheets include dry sheets and premoistened sheets.
23. (Original) The non-refillable dispenser of claim 13, wherein the housing includes a resealable cover.
24. (Currently amended) The non-refillable dispenser of claim 13, wherein the housing includes ~~is constructed from paper, paperboard, cardboard, plastic, polymer film, cellophane, and any combination thereof.~~

25. (Currently amended) A non-refillable dispenser adapted for dispensing from a table top and convertible to dispensing from a conventional rolled product fixture in a bathroom, the non-refillable dispenser comprising:

a housing formed to include having a compartment ~~configured~~ to hold one of dry sheets~~[[.]]~~ and premoistened sheets, ~~and a combination thereof therein~~ and dispensing openings positioned in the housing to permit each of the dry sheets and the premoistened sheets to be dispensed from the housing ~~therefrom~~, the housing ~~[configured]~~ designed to be positioned on a table top for dispensing sheets therefrom, the housing including two spaced-apart areas of perforations formed in the housing which, when opened, provide a pair of spaced-apart openings which ~~a hanging port to~~ permit the housing to be coupled to a fixture, the purpose for the perforations ~~hanging port~~ masked as a portion of the housing when the dispenser is positioned ~~for dispensing from~~ on a table top for dispensing, the purpose for the perforations ~~hanging port~~ unmasked when the perforations are opened to provide the pair of spaced-apart openings and the housing is configured to releasably couple coupled ~~the housing~~ to a fixture in a bathroom for dispensing sheets therefrom.

26. (Currently amended) The non-refillable dispenser of claim 25, wherein the housing includes a paperboard, ~~hanging port is formed in the housing~~.

27. (Currently amended) The non-refillable dispenser of claim 25, wherein the housing includes a polymer film, ~~hanging port is formed from an excess of material on a portion of the housing~~.

28. (Currently amended) The non-refillable dispenser of claim 25, wherein the non-refillable dispenser further comprises an excess of material on one portion of the housing, the excess of material folded against an outer surface of the housing when the dispenser is positioned on a table top, the excess of material releasable such that it forms a tent-shaped configuration having two opposing generally triangular sides, and wherein each triangular side includes one area of perforations. ~~hanging port is held against the housing by one of adhesive on the arms, a seal, and a combination thereof when the housing is positioned on a table top for dispensing therefrom.~~

29. (Original) The non-refillable dispenser of claim 25, wherein the housing is configured to be disposed at an oblique angle relative to a vertical support surface when coupled to a fixture.

30. (Original) The non-refillable dispenser of claim 25, wherein the housing is configured to be positioned substantially parallel to a vertical support surface when coupled to a fixture.

31. (Currently amended) The non-refillable dispenser of claim 25 ~~[[1]]~~, wherein each area of perforations is disposed a location selected from the group consisting of an end and a wall of the housing. ~~at least an upper portion of the housing has a width dimension which is less than a width dimension between support arms of a fixture.~~

32. (Currently amended) The non-refillable dispenser of claim 25 ~~[[1]]~~, wherein the housing includes a resealable cover.

33. (Currently amended) The non-refillable dispenser of claim 25[[1]], wherein the housing is ~~constructed from paper, paperboard, cardboard, plastic, polymer film, includes cellophane, and any combination thereof.~~

Claim 34: Canceled.
